**GPSQUEBEC.COM**

November 2018 marks our 21st year serving the mobile communications market in both Quebec (Montreal, Quebec City, Sherbrooke) and Eastern Ontario (Ottawa, Toronto, Kingston, Cornwall).

At the beginning of 2005 we began to transition TekniREP from being mostly a consulting oriented company to becoming a full "service and support" center focused on supporting our customers with their selected products.

**Specializing in Global Positioning Systems - GPS tracking and dispatch systems, devices to control your cellular usage while driving, on-board cameras, in-yard monitoring, WIFI sensors for temperature monitoring and more...**

**We can provide**

Level 1 and level 2 technical support: one call to us and we will work diligently between customers and suppliers to resolve the problem. Full statistical and detailed reporting from start to finish.

User and driver training: both on site and via web training sessions.

Installation and repair : 100% on site service.

Parts inventory and local expedited shipping: provides our customers and manufacturers with quick repair turnaround time.

**\* Bilingual Services (English and French)**
